TITLE: Magnetic transfer to make full use of master
recording capacity - by
heating recording medium, having ferromagnetic metal layer,
to record signal
and transferring to slave recording medium

BASIC-ABSTRACT:

Transfer includes heating the master recording medium, with a
magnetic
ferromagnetic metal layer having a coercive force of 1300 Oe
or more at normal
temp., to 40-150 deg.C to record the signal; and magnetically
transferring the
signal recorded in the master recording medium to a slave
recording medium at
normal temp..

The output of the master recording medium having a coercive
force of 1,500 Oe
and 1,700 Oe is increased by heating.

USE/ADVANTAGE - Used for the magnetic transfer, where the capacity of the master recording medium can be sufficiently exhibited.
